(54) Title: AN ADAPTIVE WEB BROWSER

(57) Abstract: The invention relates to a method for making it easier to carry out information search and processing with a communications device. Furthermore, the invention relates to a network browser employing the method and a www service at a server in a communications network as well as a cellular network terminal. In the method according to the invention, information entered in the address field of the network browser is utilized so that the address field with its virtual function keys is modified in accordance with the service used on the basis of information entered in the address field.
